Space Events Timeline Activity

Create a timeline with a minimum of 20 important space events.

Each event:

- 1) Should be located correctly on your timeline based on its date.
- 2) Should include a description of what happened.
- 3) Should be illustrated (at least 10 events)

Event Ideas:

- First person to use the telescope to study space
- Person who suggested that the Earth orbits the Sun instead of the other way around
- Sun-centered belief was finally accepted
- Discovery of any planet
- Launch of Hubble
- Any of Hubble's discoveries
- First to suggest the idea of a black hole
- First black hole discovered
- First to suggest the idea of galaxies
- Discovery of galaxies
- First rocket launched into space
- First artificial satellite
- First U.S. artificial satellite
- First animal in space
- First person in space
- First women in space
- First _____ in space
- First person to orbit the Earth
- First American to orbit the Earth
- First person to land on the moon
- First Space Shuttle flight
- Final Space Shuttle flight
- Space Station
- First probe to the moon
- First probe to fly past another planet
- First probe to land on another planet
- First probe to take a picture of Earth from space
- First probe to take a picture of another planet
- First probe to leave the solar system
- First probe to leave Earth's orbit
- First probe to land on an asteroid
- First planet discovered outside our solar system
- Found water on another space body
- NASA established
- First space walk
- OTHER Interesting choices
